**UNIVERSITY OF THE PUNJAB**  Dec 2017 - Dec 2020

## TECHNICAL SKILLS

HTML5  CSS3  React  Node  Express  MongoDB  PostgreSQL  Strapi

Material-UI  google script  WordPress  Github  Redux  Context-API  Typescript  Nextjs

Tailwind css  styled components

## PROJECTS

https://ezclothing.netlify.app/

I created this project from scratch. Each and every functionality. It is the Front-end of the JAM stack clothing app built in Reactjs. Context API was used for state management, MUI for UI and stripe as payment integration

https://savecontactsonline.herokuapp.com/

It was my first MERN stack app. Mongo DB for database, express for backend and Context API for state management was used.

https://enigmatic-island-20911.herokuapp.com/

This is the backend of the JAM stack application built using headless CMS strapi.

http://mantle.gg/

I was responsible for managing day to day tasks of this product during my remote job.

https://githubfindereactapp.netlify.app/

It was one of my first react apps. We enter a name and hit enter. It looks for the git repos with that name and renders them on our app.
